**Accommodation Rep**

**Manifesto:**

February will make it one year complete in University accommodation, from when I started my INTO programme. Having stayed for so long, I am very familiar and adhere strictly to the accommodation rules and regulations especially as they come with consequences. The experiences and opportunities I had interacting with people from different countries had a great effect on my socialising skills which is a key skill for anyone going for such position. Finally, I have very good ideas to give to the university which I believe will contribute to student's comfort while staying in the accommodation.
